

News Letter

KNOW4FARM-August 2024

Call for Interactive Webinar Sessions

KNOW4FARM partners are excited to announce a series of interactive webinars designed to revolutionize agricultural education. Scheduled from August to September 2024 via Zoom, these webinars aim to equip Vocational Education and Training (VET) trainers and educators with cutting-edge skills in precision agriculture, promoting digital literacy and sustainable farming practices across Europe.

The primary goal is to integrate precision agriculture technologies into educational practices, enhancing the capability of VET trainers to teach these advanced methods. By focusing on digital tools and sustainable techniques, the webinars aim to:

- Improve theoretical and practical knowledge in precision agriculture.
- Support the EU's sustainability and digitalization initiatives.
- Foster a network of skilled agricultural educators.

We invite 45 participants, with 15 from each partner country (Turkey, Belgium, Greece). Ideal participants include:

- VET trainers and educators in agriculture.
- Agricultural staff and environmental management professionals.
- Local municipality counselors.

Content Highlights

- Digital Approaches in Precision Agriculture
- Precision Farming Techniques
- European PA Technology Distribution
- Effective Crop Management with PA
- PA Practices in Livestock
- EU Initiatives in Agriculture and Digitalization

Expected Outcomes

By the end of the series, participants will:

- Gain enhanced digital and precision agriculture skills.
- Develop a deeper understanding of sustainable farming practices.
- Build a robust network with other educators and professionals.
