

PRESS RELEASE

JUNE 2024

The Erasmus+ KA210-VET Project, KNOW4FARM, with a 15-months duration, is designed to enhance skills development in Precision Agricultural Technologies for sustainable and green agriculture.

Our Activities:

- **Digital Handbook on PA techniques**

The **Digital Handbook on PA techniques** is well underway! Very soon, those interested in Precision Agriculture and its innovative methods, will have the opportunity to explore those advancements and become part of the change leading to a new digital era for agriculture and a more sustainable world. Interested individuals will have the opportunity to enhance their learning experiences with the latest approaches and methods.

- **Interactive Webinar Sessions in PA techniques**

Project Partners are collaborating to successfully and effectively design the content of the **Interactive Webinar Sessions in PA techniques** aiming to provide valuable knowledge and practical insights to participants.

- **Workshops - Field Visits in technical and practical aspects of PA techniques**

Project Partners are preparing and designing the content for the **Workshops - Field Visits in technical and practical aspects of PA techniques**. These activities will provide participants with valuable insights and hands-on experience in this vital sector.
